

Authorization on Views

- Creation of a view does not require **resource** authorization.
- A user who creates a view does not necessarily receive all privileges on that view.

Granting and Revoking the permission set to and from the user :-

- Grant : Helps to assign the permission to the user in the database system.

Syntax:-

Grant select<field name>

Update (field Name)

- Revoke : Denies the right and permission or access in the database.

Syntax:-

Revoke select(field name)

Update <field name>

On Table <table name>

To 'user name'

Where <condition>;
