

09 Bar Coding :- EAN numbers which are
used for identifying items
10 can be represented by bar codes. Bar
codes allow numbers to be encoded
11 in machine-readable form. The data can
and securely. The numeric value of the
12 code is printed on the bar code
symbol which can be read omni-
13 directionally by a scanner.

14 EAN-13 and EAN-8 numbers represented
by bar codes.

5 Figure from Book

Black bars set against a white background is the safest representation of article numbers to ensure correct scanning. The size and the light margins at each end of the bar code are other components of a bar code.
