

1.National Mission For Sustainable Agriculture (NMSA)

In order to make agriculture more productive, sustainable, remunerative and climate resilient, the Government of India introduced National Mission for Sustainable Agriculture (NMSA) in the year 2014-15. To achieve these goals, the mission promotes location specific sustainable and best farming practices; soil conservation and moisture protection measures; soil nutrient management; efficient and sustainable water management practices with mainstreaming rainfed methods.

As a major component of the mission, 'On Farm Water Management' (OFWM) is being implemented with the objective of increasing water use efficiency by promoting modern technologies such as micro irrigation and sustainable water management practices, efficient water consumption, better distribution channels along with secondary storage facilities.

2.Pradhan Mantri Fasal Bima Yojana (PMFBY)

The extreme weather conditions such as droughts, floods and hailstorms cause crop failures and financial loss to the farmers every year. And therefore, to save them from these ill effects, the Government, by merging all previous crop insurance schemes, launched Pradhan Mantri Fasal Bima Yojana (PMFBY) from Kharif 2016 season with the aim to support production in agriculture by providing an affordable crop insurance system.

Central government has made Aadhaar mandatory for availing crop insurance from Kharif 2017 season. The scheme has been restructured with states given option to determine scale of finance at district level as per average yield.
