

ABOUT IWPHRASE 2020

Environmental problems are complex and the solutions are always multidisciplinary. A sustainable environment is a dream that seems to turn real by the integrated effort from professionals of various field of study. As not a unidirectional vision can solve the environmental issues so is true that the approach must be wholesome. IWPHRASE 2020 aims to provide a unique platform to exchange and discuss current challenges and their solutions and promote collaboration among scientists, entrepreneurs and social activists. We at organizing IWPHRASE 2020 are bringing together expertise from the field of active research, social work and business development that together promises in creating a 360° vision in finding solutions for the environment, targeting public welfare and the natural resource conservation.
